Push Sale Of Canadian Wheat

Western Canadian farmer organizations are on the right track in taking steps to launch a well defined and co-ordinated program of publicity with the promotion of greater consumption of high grade wheat in consumer countries as its objective.

Within a period of a couple of weeks two of the large farmer marketing organizations have given their blessing to such a move. These are the central organization of the Canadian wheat pools, whose plan to place an all-Canadian wheat loaf before the British consumer was endorsed at the annual meeting of the Saskatchewan Wheat Pool delegates and the United Grain Growers Ltd., who, at their annual meeting in Winnipeg sponsored a publicity program for Canadian wheat overseas.

Briefly, the U.G.G. Ltd. propose to interest boards of trade and other organizations throughout the prairie provinces to sponsor a request to the Federal government to set up a special sales promotion body to be known as the Canadian Wheat Institute with offices in consumer countries, the objective being to develop greater consumption of high quality wheat, which, of course, means wheat grown in Canadian fields.

The necessity for stimulating overseas consumers' interest is cited in the following quotation from the directors' report at the annual meeting of the Saskatchewan Wheat Pool: "In spite of the fact that Great Britain remains the best Canadian overseas customer for Canadian wheat, our wheat is invariably used only for blending with other wheats, particularly in the English mills. The British people generally are not familiar with the high quality of bread which can be baked from Canadian flour."

In support of the argument that a publicity campaign should be conducted in Great Britain, figures were quoted at the U.G.G. convention to the effect that while wheat consumption of wheat has dropped 21 per cent in the past five years, Canadian wheat exports have been lowered by 49 per cent in the same period.

While this may be true, it does not necessarily mean, however, that Canada is not holding her own in competition with other wheat exporting countries as total exports have dropped far less than total consumption due to the self-sustaining efforts of a number of the former customer countries in Europe. It does demonstrate, on the other hand, a material reduction of consumption of wheat, during the period under review.

Unfortunately, there is evidence that there is actually a reduction of consumption of wheat in Great Britain, Canada's best customer for high grade wheat. Representatives of the Scottish Co-operative Wholesale Society, while in Western Canada this summer, testified that while the Scotchman insists upon bread made of high protein content, as a result of which bread sold by the Co-operative's affiliates and subsidiaries contains 65 per cent Canadian wheat, he is also eating less bread than formerly and, incredible though it may sound, is consuming less porridge. The Caledonian is substituting more expensive fruit, bacon and eggs and other commodities, for a percentage of his erstwhile substantial diet of bread and oatmeal.

There are indications that a similar situation exists in England, where the popular taste is for a lower grade loaf than the Scotchman demands. For within the past year the British millers have found it advisable to institute a five-year advertising program at considerable expense in an effort to persuade the population south of the Tweed and the Cheviots that they should eat more bread.

With many of the former markets virtually closed to Canadian wheat and the British market showing a tendency to shrink, due to changing dietetic tastes, or whatever the cause may be, the outlook is not reassuring to the Western Canadian farmer.

The farmer organizations are becoming alive to the need for taking some steps to deal with these conditions and it is to be hoped that some effective program can be devised with all interests working together to a common aim.

In some quarters it is suggested that this is an opportunity for the Canadian Wheat Board to take the initiative in co-operation with the Department of Trade and Commerce. It is pointed out that the Wheat Board, under the Canada Wheat Board Act, is vested with wide enough powers in section 8, sub-section B, which gives the board authority "to sell and dispose of, from time to time, all wheat which the board may acquire for such price as it may consider reasonable with the object of promoting the sale and use of Canadian wheat in the world markets."

Some recent experiments in the home market show that the public will respond to a loaf made more attractive by flavoring or other devices and it is possible that similar efforts to woo the British consumer would pay dividends. At any rate it is worth a trial.

Soil Survey

During the past summer the Manitoba Soil Survey under the direction of Professor J. H. Ellis of Manitoba University has made a reconnaissance soil survey of approximately 1,774,000 acres in the drought area of southwestern Manitoba.

Canada's Chief Loss

In the event of Italy retreating by refusing to buy from Canada the chief loss would be the loss of the right to the exports for the last fiscal year of wheat to the value of \$1,096,624 was shipped to that country.

The invisible larvae of the clothes moth, and not the moths themselves, do the damage to clothing.

VICKS VA-TRO-NOL

Terminates Annual Gifts

Rockefeller Believes Sectionalism In Church Is Wrong

Forfeaking the traditional practice of his father, John D. Rockefeller, Jr., has terminated his annual monetary gifts to the Northern Baptist Church in the belief that inter-denominationalism is the best servant of Christian religion.

In a searching letter to the Northern Baptist convention, written March 7 last, but revealed only recently, the son of the founder of one of the world's greatest fortunes informed the church that henceforth any future gifts would be only to specific agencies of the church.

"I have long felt," he wrote, "that the denominational emphasis is a divisive force in the progress of organized Christian work and an obstacle to the development of the spirit and life of Christ among men."

To hold young people, Rockefeller said, who are largely unconcerned with denominational distinctions, the church must work with them on relegating the non-essentials to a place of secondary importance and deal with them for the fundamentals of Christian duty.

Rockefeller, the largest individual donor to the church, has in the past annual donations paid for a quarter of \$250,000 to \$1,000,000 to the general budget of the Northern Baptist convention.

Made Noise Like Plane

Swarming Wasps Routed Pack Trains In B.C. This Year

Wasps were numerous throughout British Columbia this year. Hundreds of them swarmed over the pack trail ground of the Cariboo district and of Vancouver Island.

"You could stand still anywhere in the woods, listen quietly, and hear humming like a flock of distant airplanes," a logger in the Courtenay district of Vancouver Island reported.

He told of finding an area where a bear had demolished a dozen nests in the space of a quarter of an hour, feasting on the young wasps it found.

Many nests were situated on the Porcupine Flats and pack trails. They were often attacked by the stingers. Horses rear and plunge as the swarms sail in the attack. The stings remain with the horses only a few minutes, however, and they are soon quiescent.

Unique Picture Gallery

Has Been Hobby Of Hotketter For 35 Years

Trail, a little mining town in British Columbia, boasts a unique picture gallery. It is owned and operated by Peter Levesque, a hotketter, who has made it his hobby for 35 years, and it covers every inch of wall space in its gallery.

The gallery includes a photograph of every prominent man or woman who has visited Trail since 1900, and many of the photographs are autographed. All carry a short biography of the subject in Mr. Levesque's own writing, each ending with "and word died," followed by a blank space to be filled in when the time comes. Some of the subjects have been given the most careful attention to detail a lifetime premature.

Making It Clear

More knocked the ashes from his cornucopia and put it on the mantlepiece. "Mandy," he said, "I'd like to give you on mah best clo's an go down to the theatre tonight to see de chorus ladies dance."

Mandy turned a stony eye on him. "Mose," he grumbled, "denissen. If dat am what you thinks, den you'd better puttin' agin. Nigah, you ain't gonna get up on nothin' to no goin' on no time, so you s'posed to do nuffin'; never, nufnow, and not at all. Does yo' understand?"

The goffer had lost his ball, and not unaturally, was inclined to be annoyed with his caddie.

"Why didn't you watch where it went?" he asked.

"Well, sir," said the boy, "it don't usually go anywhere, and so I took me unprepared like."

In addition to ancient eggs and birds' nest soup, the Chinese are preserved eggs of dogs' heads. These are made into mounds, from roses, parrots, ducks' gizzards, and canned earthworms.

Fish can be kept fresh for three months by means of a new process of brine freezing perfected in England.

In case you are interested, the salary of a member of parliament is \$3,600.

Some people are noted for their ability to recollect things that never happened.

If You Eat Starches Meats, Sweets Read This

Here All Necessary Food—But All Acid-Forming. Hence Most of Us Have "Acid Stomach." At Times, Easy to Relieve.

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really acid indigestion—brought about by too many acid-forming foods in our stomach diet. And that there is now a way to relieve this . . . often in minutes!

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this sets to neutralize the stomach acidity that brings on your trouble. You "forget you have a stomach!"

Try this just once! Take either the familiar liquid "PHILLIPS", or now the convenient new Phillips' Milk of Magnesia Tablets. But be sure you get Genuine "PHILLIPS".

Also in Tablet Form: Phillips' Milk of Magnesia Tablets. New and Improved. Each box contains 12 tablets. Each tablet contains 1/2 ounce of pure Milk of Magnesia. Phillips' Milk of Magnesia is made in Canada.

English Language Changes

Words Drop Out And Come Into Use Again

A sign of the way in which the English language changes is seen in the use of the word "tremble," when describing earthquakes. In the last few days it has frequently appeared in news dispatches, but we were unable to find it in the Shorter Oxford English dictionary or the Webster's.

It is in the Webster's, however, though we thought it would surely be in the last. We could find "tremble," that is, one who trembles, and "tremor," that is, an agitation of the limbs, or of the earth, but no "tremble." The Century dictionary quoted J. Milton as using the word "tremor" as follows: "Modern research has shown a typical earthquake to consist of a series of small tremors, succeeded by a shock or series of shocks."

The word was not in the body of the text of Webster's New International dictionary, either, but it was included in the footnotes, and this is what we read: "tremble—erroneous for tremor." And what is "tremor"? It is Spanish for earthquake, says Webster. From an old dictionary, the Standard, published in the thirties, we got a little more information. It contained "tremor"—the word there has an extra "r"—which were defined as "tremors of the earth surface in volcanic districts." The word is Spanish, from "temblar"—without the "r"—meaning tremble. It was derived from South America. Apparently it was in common use in America, in its erroneous form, at the end of the last century, but it dropped out of the dictionaries and has now made its reappearance, just like a dandelion in a lawn—Hamilton Spectator.

Java Has No Poor

Native Diet Is Frugal And Everyone Has Enough

Speaking of the world tour of Lord Baden-Powell and herself which recently concluded with their visit to Canada, Lady Baden-Powell mentioned their stay in Java, and added: "I might say there isn't a poor native in all of Java. Of course the native diet is frugal—a handful of rice and a couple of bananas is sufficient each day. But we could learn a lot from the attitude of these Eastern people. Their kindness, their friendly spirit and their goodness shine from their eyes."

More Statistics

"When one gets a piece of dust in his eye he should remember that the earth weighs 5,885,514,000,000,000,000,000 tons," says The St. Thomas Times-Journal, and the London Advertiser remarks it might also help to recall that there are roughly 2,000,000,000 people in the world ready and willing to plug mutes out of other folks' eyes.

The moon sometimes comes 30,000 miles closer to the earth than at other times. It does not travel in a perfect circle around the earth.

Arithmomania is a strange malady. The sufferer is characterized by uncontrollable desire to count things.

Tung oil has been important in China over 5,000 years.

Poultry Congress In Leipzig

Exhibit Building In Berlin Was Destroyed By Fire

Owing to a serious conflagration in the city of Berlin, Germany, the large building in which the two bird congresses of the Sixth World's Poultry Congress was to have been held in 1936 was destroyed by fire. As there was no other hall in Berlin large enough for the purpose, the Congress authorities decided to hold the Congress in Leipzig. According to the information, this arrangement will give better accommodation than was possible in Berlin, while at the same time the delegates will have every opportunity of seeing the sights in and around Berlin itself on the occasion of a pre-arranged visit. Provision is also being made for the delegates to visit the Olympic Games, which will be held on the outskirts of Berlin. A Canadian tour is being arranged, and already there have been some definite bookings and a large number of applications for information.

Propane Gas Has Many Uses

Can Cool A Refrigerator Or Run A Motor

One of the products of oil and gas wells is a condensable gas, propane. Under compression it is a liquid, but if released to atmosphere it becomes a gas. When it changes from a liquid to a gas it has properties similar to dry ice, solid carbon dioxide. It has frequently been suggested that propane could be used for a dual purpose with completely open prospects. It could be evaporated from the liquid state through coils of pipe to cool a refrigerator and the vapor could then be run to a gas stove, where it could be burned as fuel. A parallel application applied to motor trucks transporting perishable foods is described in "Food Industries." The propane is first used for refrigerating the body of the truck and is then used as fuel for the motorising the gasoline.

Told Astonishing Story

Fishermen On Caspian Sea Marooned For Five Days

Thousands of Caspian fishermen told an astonishing story of having been marooned on the bottom of the sea for five days, dispatched to Moscow stated.

Their report was that at the busiest period of the fishing season the sea itself retired from under the fleet.

It receded along 150 miles of the northern shore line of the Caspian Sea, leaving the ships high and dry several kilometres from cold earth. The airplanes dropped food and the marooned men until the tide flowed back—and allowed them to refloat their ships.

Increase In Dairy Herds

A survey of farms on the Lethbridge Northern Irrigation area shows an increase in dairy herds and a steady level in prices for cream. There are altogether 3,500 cows of which about 2,400 are Holsteins in the district, but with 100,000 more available these numbers are capable of considerable increase.

Took Name From Islands

The Canary Islands were called "Canaria" by Piny, because of the multitude of dogs of great size found there. The domesticated canary took its name from the island, and not the islands from the bird.

The large, white, funnel-shaped "plumons" of the calla lily are not the true flowers at all, but outer leaves. The real flowers are tiny, inconspicuous things, crowded together on the club-like spadix in the centre.

It has been estimated that twice as many boys as girls figure as victims of road accidents, while eight times as many boys as girls are drowned.

The poisonous toadstool and the common mushroom are of the same family.

Unique Design For Windows

South Africa's New Post Office Using Replicas Of Stamps

South Africa's new post office which is now under construction is to have stained glass windows in the form of enlarged replicas of the Union's halfpenny, penny, twopenny and fourpenny postage stamps. Interventions with the stamp designs are representatives of a streamlined train, aeroplane, a motor ship, and a radio station emitting sparks. A pair of symbolic poles help to balance the design which are supported by medallions, sketches of mail coaches and other old methods of postal transport—L. A. Barnes.

To Learn English

In the last two years nearly 4,000 foreign girls have gone to England to become domestic servants, most of them being well educated and of good family, but adopted this means of improving their knowledge of English.

Asia, with its 16,700,000 square miles, is the most populated continent. It has more than 954,000,000 inhabitants, or over half the population of the world.

About 80 per cent. of our drinking water is treated with liquid chlorine to destroy the harmful bacteria.

The hardest job a clerk ever tackled is trying to sell a woman something that can't be exchanged.

The card party given by the B. Hamilton Club Friday night in the Community hall was a big success. A large crowd attended. The first prizes went to Mrs. C. Anderson and Geo. Deque and the consolation to Mrs. C. Lachia and Geo. Orr.

IT PAYS TO ADVERTISE

Speaking recently at a meeting in London, England, the Lord Mayor of that city recited the following ditty:
The fish lay ten thousand eggs,
The henly hen lays one;
The codfish never catches,
To tell you what she's done;
And so we secure the codfish,
And the henly hen we prize;
Which demonstrates to you and me
That it pays to advertise!

Mr. and Mrs. Gille spent the week end in Calgary.

Mrs. J. N. Boushler was a week end visitor in Calgary.

The rink will be opened for both curling and skating as soon as possible. B. Hamilton and H. Stephenson will be in charge.

Apples are good buying, see our Delicious McIntosh Reds, Northern Spys, Wagners and Jonathans at Campbell's.

Mr. and Mrs. C. Lachia, Mrs. Stephenson, Mr. and Mrs. Max Groves, Mr. and Mrs. J. Groves, L. Groves and Mrs. F. Wilson attended the funeral of Mrs. A. Goetz on Monday.

The frost of the winter may be mild as foxes and other hoarding animals have not done heavy coats. However, man and beast have not made their homes yet, and fish have not taken to deep water.

Local & General

M. F. Hamilton was a Calgary visitor this week.

Mrs. B. Hamilton was a week end visitor in Calgary.

Mrs. W. E. Williamson spent the week end in Calgary.

Mrs. Mable Jones visited relatives in Edmonton last week.

Mr. and Mrs. Joseph Klein of Calgary are visiting their daughter, Mrs. Andy Kurtz.

Pitted Dates, Saltana Raisins, Symra Figs, everything for your Xmas cake at Campbell's.

Don. Stephenson is spending a few days in Calgary visiting his sister, Mrs. Gordon Rouse.

The O. E. S. Chapter are holding a card party in the Community hall Friday night.

Mrs. Richard Davis was operated on for appendicitis at the local hospital on Saturday.

Arnold Bond celebrated his 14th birthday on Saturday. A number of boys went out to the farm and had a big time.

Choose your Xmas gifts now, we will put them away until wanted at Campbell's.

An enjoyable evening was spent at the home of Mr. and Mrs. A. Miller on Friday when Leah and Jimmie entertained about 20 of their friends.

Xmas candy just arrived, wonderful values and special discount to schools. See our stock before placing your order at Campbell's.

Mrs. P. Gatenby assisted by Mrs. Luff and Mrs. Farris was a bridge hostess on Wednesday in honor of Mrs. J. N. Boushler, who leaves shortly for California.

Bills are out for a dance put on by the School to be held on Friday 6 p.m. to 11 p.m. in order to raise funds for the Christmas concert. Duo and Rhythm Boys are playing.

Special, about dozen pair only, Boy's Shoes, sizes 2 to 6. Values up to \$4.50 to clear at \$1.95 a pair at Campbell's.

Rev. Peter Dawson, M. L. A. took charge of the services in Grassy Lake United church on Sunday, November 24th. It was the 25th anniversary. Rev. Dawson gave an address in Bow Island Monday at a congregational social.

Attention! O.O.R.P.

The next regular meeting of the O.O.R.P. will be held in the Champion Community Hall on Tuesday evening, December 3rd, 1935.

A good attendance would be appreciated.

DEWILLO HEMMEL
Secretary.

Japanese Wages

Is the world due for a complete re-vamping of the capitalistic system? Certain currents seem to indicate this. Wages in Japan are very low. A policeman draws about \$9.00 a month. Laborers generally run around \$9.00 to \$10.00 while many professional men draw no more than \$18 or \$20 a month. Of course there are some compensating factors. Sardines sell for as low as 1¢. He pays 10 cents a month for his radio and his electricity. He can go to the moving pictures for two cents. He can buy ten cigarettes for two cents. Education is free and clothes are next to nothing in price.

No wonder they can offer electric bulbs to the world for one cent, rubbers at 14 cents a pair and a silk shirt for a dollar. It is against such devastating competition that our manufacturers demand protection if we are to preserve our western standards. We feel the average misinformed consumer agrees. What he does oppose, and rightly, is the abuse of the protective tariff to increase prices merely to profit those who control.

Leonard Volney is helping in the drug store.

Lethbridge Experimental Letter

Smooth-Award Varieties of Barley. There is always the desire on the part of experimental workers to produce varieties of grain that excel those that are in common use. This has been particularly true during the last decade in the case of barley. Many members of university and experimental farm staffs could recall the days of their boyhood when their fathers thrust on them the disagreeable task of stocking the barley crop, and they could see a wonderful opportunity for making many close friends for themselves among the boys of the present generation by developing a barley with smooth awns that would not here through a boy's clothing and remain there until they were removed by hand. Consequently several varieties of smooth-awned barley have been introduced.

Most of these varieties have been under test at different institutions for only a few years, and it is too early yet to single out any one of them and recommend it over all others of this type. There is reason to believe, however, that before many years a variety of smooth-awned barley will be found that will give equally as good results as the rough-awned varieties that are in common use at present. Among those which have appeared most promising in our tests at the Lethbridge station for the past two years are Samalta, Nohar, Newal, Regal and Glabon. With this exception of Samalta which is two-rowed, these are six-rowed varieties.

Barley straw has considerable value as feed, but the awns make it less desirable as these are sometimes found to be injurious to livestock. Smooth-awned varieties should, therefore, produce straw of superior feeding value. Under certain conditions it is sometimes desirable to

sow a mixture of oats and barley, or even barley alone, to be cut for greenfeed. While smooth-awned varieties would be much superior to rough-awned ones for this purpose, they would still not be nearly as suitable as varieties such as White Hulls or Cobles, which are hoodless or Cobles, which are hoodless varieties instead of awned and which, on account of a heavier leaf growth, give a better quality of straw.

Smooth-awned varieties of barley have been thoroughly tested for maling purposes, and it has been

found that no variety of this class can be considered suitable for this standpoint. In fact, the National Barley Committee, which is a sub-committee of the National Advisory Committee on Agricultural Services, cautions farmers against growing any of the smooth-awned varieties for maling purposes. Incidentally, it might also be mentioned here that Trebi, a good variety of feed barley, is also a very undesirable maling variety. O. A. C. 21 is still the variety preferred for maling.
